Michael Levy Gallery

Nearly four decades ago, Michael Levy fell in love with the world of art and decided to focus his career on furnishing his future clients with exceptional art and value. Since then, Michael Levy Gallery has been instrumental in establishing prestigious collections throughout Orange and Los Angeles counties. The gallery concentrates on the work of blue-chip artists, with established value histories, across a wide price range. A visit to the gallery finds work by 20th Century Masters, Marc Chagall, Pablo Picasso and Joan Miró, Mixografia, works by Rufino Tamayo and colorful graphics by Alexander Calder, alongside works by other highly collected, but not as well-known artists like James Coignard and Max Papart. Additionally, the gallery often features California plein air watercolors and oil paintings, and selected sculpture and glass art.

Levy attributes his gallery's success to several key factors. Early on, he connected with banks, probate attorneys and insurance companies, needing expertise with values and liquidation of art. As a gallerist and an experienced art-appraiser, Levy was well-positioned to provide the necessary link between these firms and his interested collectors looking for top-flight artwork and great value. Today, as much as half of the gallery's business results from art acquired through estate and insurance liquidations.

Just as important, the gallery offers an art exchange policy that takes the fear factor out of collecting for buyers at all levels. Anything purchased at Michael Levy Gallery comes with full purchase price exchange privileges toward future purchases. The policy is fueled by confidence in the art – and has directly resulted in first-time art purchases by many, now loyal, collectors.

Michael Levy Gallery offers a full range of other art services including: fine art valuation and appraisal, custom framing and professional installation. The gallery will consider selected works for sale on consignment. Michael Levy Gallery is located at 6226 East Pacific Coast Highway in Long Beach, 90803. The gallery can be contacted at 562.856.9800 or at artofhands@aol.com.

Tangible Investments Inc.

Most investors these days have substantial exposure to the stock market. Even in the best of times, expert financial planners recommend diversification. In today's environment, it's tremendously risky not to have truly diversified portfolios. In a recent study of stock market patterns over the past 100 years, it was found that there were 20 major crashes.

Eight crashes occurred with drops between 20–30%, five drops between 30–40%, four between 40–50% and one major crash that fell 89% — with all of these based on the Dow Jones Industrial Average.

Now, the major issue that most tend to overlook is what is the recovery time? From the 1929-31 crash, it took over 20 years to recover. The 1966 crash took 16 years! The 2000 crash took six years and the most recent crash in 2007, with a bottom in 2009, took five years to get even.

One more factor to keep in mind before discussing how to protect yourself is that the Dow is really a moving target. The returns are greatly inflated because stocks are constantly changing! The gurus want to point out that the Dow is up double-digits on average annually, which is not so. Dozens of stocks have been replaced and some actually went bankrupt.

Now here is the protection. In the 100-year study, gold was graphed next to the Dow in each of the crash periods. Gold maintained or increased in value each and every time. Here are the highlights: in the 1929–33 market crash, the Dow was down 89% and gold was up 68%; in the 1966–74 crash, the Dow was down 38% and gold was up 426%; in the 1999–2003 crash, the Dow was down 31% and gold was up 58%; in the 2007–09 crash, the Dow was down 52% and gold was up 73%.

Gold acts as the ultimate diversification for major market corrections. It is an insurance policy for your portfolio and an essential part of any balanced portfolio.

Please call 888.788.0089 for additional information and a free 100-year study of Gold vs. Dow Jones.
